

## Server Guide

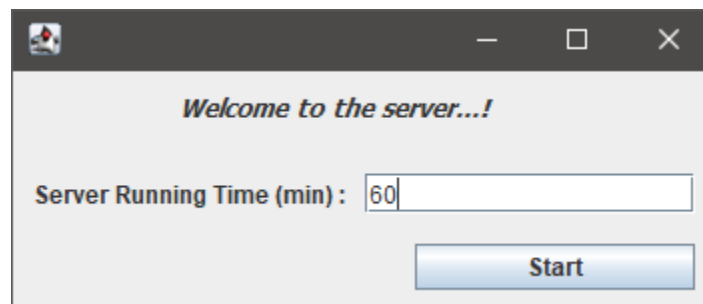

1. This is an eclipse project so firstly you should import this into the eclipse Workspace.  
(to import refer readme.txt)
  2. Open " **BiddingServer\src\serverGui\GetRunDetails.java**" and run that file.
  3. Continue with the following given instructions.
- To Start the server give correct port numbers (Client server port : 2021, Subscriber Port : 2022)

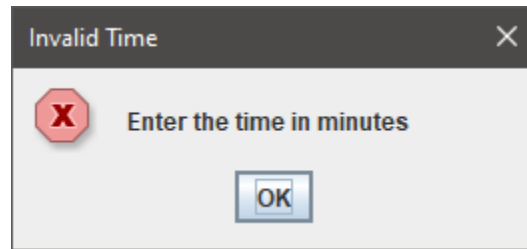

- Check whether the entered ports are correct and if correct, click on **Yes**.

- Enter Bidding time in **Minutes** and **start**

- If you entered a wrong input, it will pop-up an error message like this. If so, please check whether the entered time is valid or not.

- This is server Interface

1

Bidding Time End After : 58min 29s

Symbol	Price	Profit	Last Bid Customer	Last High Bid Time
AAL	1.32	7500	-	-
